BIOBELLE SOAPNUT SHOWER GEL is a unique formula using extracts from the Indian soap nut, which has been used in India for hundreds of years as an excellent body cleanser.

All soap nut fruits used for the manufacture of the extract comes entirely from wild grown soap nut trees.

The soap nut contains saponine which is gained from the shell and has an exceptional cleansing, caring and antibacterial effect.

Due to an ayurvedic extraction procedure the soap nut can be used in liquid form. With added active ingredients from extracts of rosemary, horsetail, chamomile, sage, wheat proteins as well as stevia, which gently cleanse while at the same time cares for your skin.

The light creamy foam provides the skin with a soft and gentle sensation.

In three aromas:

Floral Scent
Flowery, sensual scent

Lemon grass
Fresh-dry scent

Sensitive
Neutral scent,
free from essential oils
